# **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Fredric Zimmerman on 1 June 2004.

The application has been amended as follows:

# **IN THE CLAIMS:**

### Claim 23:

In claim 23, line 2, delete "in a range from greater than 26 µm to"

### **Claim 37:**

In claim 37, line 1, change "34" to --36--.

#### Claim 38:

Cancel claim 38.

## **Drawings**

2. The following changes to the drawings have been approved by the examiner and agreed upon by applicant: The proposed drawings changes for Figure 5 filed on 1/23/2003 have been approved by the Examiner. In order to avoid abandonment of the application, applicant must make these above agreed upon drawing changes.

# 3. Reasons for the amendment:

Claim 23 was amended to remove new matter from the claim. Claim 37 was amended to correct lack of antecedent basis. Claim 38 was cancelled because it contained new matter.

- 4. Claims 1-10, and 17-37 are allowed.
- 5. The following is an examiner's statement of reasons for allowance:

The closest prior art of record, Nagele et al. (US 4,816,359) discloses an electrode comprising polymer active material having a thickness of up to 10 mm (see col. 3, lines 1-44) but does not disclose, teach, or suggest that the electrode contains plasticizer. It would not have been obvious to one of ordinary skill in the art to add plasticizer to the polymer electrode because it is made by a different method such as electropolymerization where the polymer is deposited by anodic current (col. 2, lines 1-10) and the holes in the polymer films are formed by perforating by needling or piercing (col. 3, lines 1-6).

The closest prior art of record, Hoshi et al. (US 6,299,653 B1) discloses a molded electrode comprising a polymer active material and a current collector but does not disclose,

Application/Control Number: 09/689,817

Art Unit: 1745

teach or suggest any of the following features: 1) that the molded electrode comprises a plurality of current collector sheets; the electrode material and the current collector sheets are formed into one piece and the current collector sheets are spaced from each other in the thickness direction of the electrode or 2) that the ratio of the volume of the electrode material and the volume of the current collector sheet in the molded electrode is 30:1 to 100:1 provided the volume of the terminal portion of the current collector sheet is excluded from the volume of the current collector sheet, or 3) that the electrode comprises plasticizer and has a thickness of 300 micron to 9mm formed on at least one side of the current collector sheet.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

6. Any inquiry concerning this communication or earlier communications should be directed to examiner Susy Tsang-Foster, Ph.D. whose telephone number is (571) 272-1293. The examiner can normally be reached on Monday through Friday from 9:30 AM to 6:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Patrick Ryan can be reached at (571) 272-1292.

The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Art Unit: 1745

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
